OUR PROMISE

The Well-Built Warranty.

Every packaged air conditioner we build is covered with a 10-year parts limited warranty. This warranty applies to the original owner of the properly registered product. Ask your WeatherMaker® dealer about optional labor warranties.*

Run-tested and right for you.

Because we only feel comfortable providing you with long-lasting comfort and efficiency, only products that complete our testing with a 100% success rate make it out of the factory.

WHAT IS SEER2?

Like a car's mpg, SEER2 (Seasonal Energy Efficiency Ratio) is the measure of cooling efficiency for an air conditioner. It tells you how much heat is removed from your home in relation to how many watts per hour it takes to reach your set comfort level. The higher the number the better, because when you waste energy you waste money.

To give you an example, the minimum SEER2 level for cooling operation in the U.S. is now 13.4. WeatherMaker offers models that meet or exceed that, giving you even better efficiency.

For homes that are designed to use packaged air conditioners, these models have both the interior and exterior components of traditional split-system air conditioners combined in one outdoor unit.

* Warranty period is five years if not registered within 90 days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts limited warranty. See warranty certificate for complete details, terms and exclusions.

PEACE OF MIND

When you purchase WeatherMaker® products, you will soon find out why they are right for you. Our packaged air conditioners aren't just affordable – they're built to perform. And since packaged air conditioners operate entirely outdoors, all components are designed for maximum durability.

NON-OZONE DEPLETING R-410A

These packaged air conditioners use the EPA-approved and chlorine-free R-410A refrigerant which does not contribute to ozone depletion.

- 1 Lasting protection** – Exterior cabinetry is coated with a rugged baked-on enamel finish to provide scratch and corrosion resistance.
- 2 Reliable R-410A compressor** – You want the most important part of the entire unit to stay running strong, right? With built-in protective features, our compressor operates quietly and reliably for years of cooling comfort.
- 3 Opt for heating** – Our optional heat package can be added to the blower cabinet to provide heating for areas that need it.
- 4 Solid foundation** – Our durable, composite base features outstanding drainage to help inhibit mold, algae, and bacterial growth. Outside, metal base rails provide added stability, plus easier handling and rigging for the dealer.

PACKAGED AIR CONDITIONERS

PA4G

13.4
SEER2

- Single-stage compressor
- Ground or rooftop installation
- R-410A refrigerant
- Aluminum standard indoor coil
